PROFILE

Third-year B.Sc. Data Engineering student focused on real-time sports data, building it in his own time because he loves it. Built a working miniature of a live sportsbook feed and an in-play pricing model, plus scraping/ETL pipelines into PostgreSQL and MongoDB. Learns fast and goes deep. Seeking a student or junior Data Engineering role.

EDUCATION

Ben-Gurion University of the Negev 2022 – Present
B.Sc. in Data Engineering Beer Sheva, Israel

- Completed Year 3 over 4 academic years due to extended reserve service during wartime.

SKILLS

Languages: Python, SQL, Java
Data Engineering: ETL pipelines, Web scraping, REST APIs, PostgreSQL, MongoDB, Docker, Git, RabbitMQ
Data & ML: Pandas, NumPy, Scikit-Learn, XGBoost
AI-Assisted Development: Claude Code, Cursor IDE, agentic workflows
Spoken Languages: Hebrew (native), English (proficient)

SPORTS DATA PROJECTS

Live Match Pipeline – a mini TRADE360 | *Python, RabbitMQ, pytest*

- Replays World Cup 2026 matches as a live message feed over a RabbitMQ topic exchange, with per-fixture sequencing, gap detection and snapshot recovery; an in-play model publishes 1X2 prices.

In-Play Win-Probability Model | *Python*

- Fit on 3,272 matches and 82,310 shots, back-tested blind on 864 matches.

La Liga Match Data Pipeline | *Python, PostgreSQL, Docker*

- Automated scrape → validate → load pipeline with scheduling, retries and idempotent upserts.

World Cup Analysis Pipeline | *Python, MongoDB*

- High-volume social-media collection around fixtures, linked to in-game events.

EXPERIENCE

IDF Military Reserve Duty 2023 – 2025
Engineering Site Manager – Tunneling Projects Israel

- Led applied research and field experiments in subterranean environments under wartime operational pressure, managing data collection and reporting.

Ministry of Health 2020 – 2021
Epidemiological Investigator Israel

- Certified in epidemiology and infectious disease control; conducted COVID-19 case investigations and data analysis.

IDF Mandatory Service Dec. 2017 – Aug. 2020
Underground Research Unit Israel

- Served in operational and research roles within specialized underground environments.
