PROFILE

Third-year B.Sc. Data Engineering student who builds football intelligence tools end to end, in his own time, because data and sport is what he loves. Nine live sports-data projects at rshiri.github.io: a calibrated xG model with a plain-language explainer, automated match-data pipelines across several sources, and dashboards for football, basketball and F1. Learns whatever the problem needs and ships it properly. Seeking a student or full-time role in Data / AI engineering.

EDUCATION

Ben-Gurion University of the Negev 2022 – Present
B.Sc. in Data Engineering Beer Sheva, Israel

- Completed Year 3 over 4 academic years due to extended reserve service during wartime.

SKILLS

Languages: Python, SQL, Java
Data & ML: Pandas, NumPy, Scikit-Learn, XGBoost, Streamlit, Plotly
Data Engineering: Web scraping, ETL pipelines, REST APIs, PostgreSQL, MongoDB, Docker, Git
AI-Assisted Development: Claude Code, Cursor IDE, agentic workflows
Spoken Languages: Hebrew (native), English (proficient)

SPORTS DATA PROJECTS

xG Model + Interactive Explainer | *Python, Scikit-Learn, XGBoost*

- Shot-value model trained on ~78,000 real shots (La Liga, Premier League, World Cup), calibrated on held-out shots, with an interactive page that explains to non-technical readers how each shot is valued.

World Cup 2026 Data Pipeline & Dashboard | *Python, MongoDB*

- Event and social-media pipeline around every fixture; match centres, predictions and fan-sentiment timelines.

EPL & La Liga Analytics (XEPL, XLALIGA) | *Python, Pandas, PostgreSQL, Docker*

- Scraped, validated and stored match/player data with scheduling and retry logic; league tables, shot maps, xG efficiency lab, Poisson season projection.

NBA Analytics Dashboard | *Python, Streamlit, Plotly*

- Interactive team and player performance dashboard.

EXPERIENCE

IDF Military Reserve Duty 2023 – 2025
Engineering Site Manager – Tunneling Projects Israel

- Led applied research and field experiments in subterranean environments under wartime operational pressure, managing data collection and reporting.

Ministry of Health 2020 – 2021
Epidemiological Investigator Israel

- Certified in epidemiology and infectious disease control; conducted COVID-19 case investigations and data analysis.

IDF Mandatory Service Dec. 2017 – Aug. 2020
Underground Research Unit Israel

- Served in operational and research roles within specialized underground environments.
