PROFILE

Third-year B.Sc. Data Engineering student specializing in Data Science, focused on real-time sports data. Hands-on experience building end-to-end data pipelines — scraping, processing, storing and analyzing live football and basketball data. Fast learner who leverages AI-assisted development (Claude Code, agentic workflows) to ship production-grade tools quickly. Seeking a student or full-time position in Data Engineering / AI.

EDUCATION

Ben-Gurion University of the Negev

2022 – Present

B.Sc. in Data Engineering

Beer Sheva, Israel

- Completed Year 3 over 4 academic years due to extended reserve service during wartime.

SKILLS

Languages: Python, Java, SQL

Data & ML: Pandas, NumPy, Scikit-Learn, PyTorch, XGBoost, Streamlit

Data Engineering: Web scraping, ETL pipelines, REST APIs, PostgreSQL, MongoDB, Docker, Git

AI-Assisted Development: Claude Code, Cursor IDE, agentic workflows

Spoken Languages: Hebrew (native), English (proficient)

SPORTS DATA PROJECTS

La Liga Match Data Pipeline | *Python, PostgreSQL, Docker*

- Automated end-to-end pipeline that scrapes, cleans and stores La Liga match and player data, with scheduling, retry logic and data validation.

World Cup Social Data Pipeline | *Python, MongoDB*

- Large-scale social media data collection around World Cup fixtures, linking fan sentiment to in-game events.

Barcelona Elite Analyzer | *Python, XGBoost, Scikit-Learn*

- Machine learning models on scraped FC Barcelona match data to surface performance patterns.

Bricklink Price Analyzer | *Python, Pandas*

- Marketplace pricing engine for price volatility and market trends — methods transferable to odds/market data.

EXPERIENCE

IDF Military Reserve Duty

2023 – 2025

Engineering Site Manager – Tunneling Projects

Israel

- Led applied research and field experiments in subterranean environments under wartime operational pressure, managing data collection and reporting.

Ministry of Health

2020 – 2021

Epidemiological Investigator

Israel

- Certified in epidemiology and infectious disease control; conducted COVID-19 case investigations and data analysis.

IDF Mandatory Service

Dec. 2017 – Aug. 2020

Underground Research Unit

Israel

- Served in operational and research roles within specialized underground environments.
